		50%	50%	100%	
53869054H	39520873L /49503484D	75%	50%	63%	Game: With three members in the team, I expect the game to be exactly as the copy. Many effects are missing and functionality. Code: Repo contains old handouts, versions and other irrelevant data.
77621881D	53322522N			NP	Game does not work, closes immediately
47891667D	48031758F			NP	
49503484D	47941194V			NP	
53324544X	25627777G	75%	75%	75%	Game: You have not even changed the window title :(Game crashed once. Ball debug draw seems misplaced. Code: Commit comments like "." or "s" do not help, do not be lazy. CreateFlippers() is not generic for ModulePhysics. TODO comments still there.
47752446F	21774883R			NP	Game: a Code: b
48172434S	47892495D	100%	75%	88%	Game: Good Code: Repo contains .zip files :(Sensor methods and CreateFlipper should not be part of ModulePhysics
43472918C	46419282S	75%	100%	88%	Game: good job Code: ModulePhysics should be generic, CreateFlipper should be unnecessary. CreateChainSensor is just a copy of CreateChain with one more line ? ModulePlayer is empty, it could have contained the flipper code that is all in the scene.
47276473L	47421975T	50%	50%	50%	Game: Cannot exit with ESC, flippers move around weirdly, after three balls nothing really happens, even pressing R Code: Ugly zip and exe files in the repo. CreateRectangle and createRectangle sensor only differ in one line :(
23926612B	47110759C / 47663600X	25%	50%	38%	Game: With three participants I expect the game to be exact. No score, no correct drawing order, no proper reaction from elements, audios missing, ball gets stuck on top of the flippers, etc. Code: ModulePhysics is meant to be generic, no coord data should ever be there. Repo has dll files mixed with code files.
24555684X	43578307T	50%	0%	25%	Game: No graphical flippers and they are not working well anyway Code: Nice ASCII art :) CreateRectangle and createRectangle sensor only differ in one line
48101968K	23899868Q			NP	
48068147X	41015659N			NP	
23843615K	48095185T	50%	25%	38%	Game: game is pretty broken, ball appear out of nowhere, bounce crazy, flippers collider does not adjust to graphics, audio is terrible Code: Code should never be in another language that is not english.
